"The Silent Leader in Managed Care"

Out of Network IRON – Risk Free Augmented Services

Why is Out of Network Signed Agreement an important Tool?

- Offering injured parties the flexibility to use providers of their choice is often a necessity that puts the insurance payers in the challenging Out of Network territory.
- Often, we have seen 50-70% of medical provider charges that are Out of Network that could drive a significant portion of the medical cost

How the 50-70% can affect you when it comes to managing your medical costs:

Lack of
pre-negotiated
billing rates

Inconsistent
and ambiguous
settlement values

Contentious
interactions with
unfamiliar providers

Out of Network IRON – Signed Agreement Business Model

- We review each bill to see if the charges accurately reflect the procedure, facility usage, supply usage, and other factors.
- Our negotiators talk with providers to arrive at a mutually acceptable reimbursement within the regulatory parameters that apply, based on our benchmark data.
- A signed settlement agreement is obtained from the authorized provider representative to prevent legal disputes, reconsiderations and to aid in proper reserving of the claim.
- Risk Free Model - We only charge a fee if we are able to achieve savings from negotiations and always below what you are required to pay from a regulatory standpoint
