## Medical File Review Services

- ICS Medical File Reviews are utilized to assist in evaluating cases with a focus on assessing causation, impairment, and appropriateness of care. Our Subject Matter Experts cover the following areas:
  - Explanation and definition of medical terminology and treatment
  - Review of any prior injuries, pre-existing medical conditions or Mitigating Factors
  - Commentary on the causal relationship of diagnoses and/or treatment to the loss
  - Suggestions for additional investigation, independent medical examinations and/or reviews
  - Outline of future treatment and/or related impairment
  - Chronological summary of the medical treatment with medical literature citations
  - Questions that may be used for depositions or trial
  - Illustrations and demonstrations for trial presentations

The ICS File Review provides the carrier, the adjuster, or defense counsel with a comprehensive expert review of medical records, identify providers and missing records, provide a detailed timeline of events cross-referenced with organized medical records, analyze injuries and pre-existing issues and determine what aspects of the case require your focus and attention.

The ICS File Review is a valuable reference tool for the evaluation of claims and accurate reserving. During negotiations it gives the adjuster a quick summary of the medical records to refer to while speaking with attorneys.

The reviewing nurse acts as a medical resource for the carrier, adjuster or attorney. The nurse can make the appropriate recommendations for referrals to medical experts when indicated. A nurse acting in this role has a broad knowledge of a variety of medical subjects and clinical experience with traumatic injuries. We accept the records in hard copy format, on CD-ROM, or electronically leveraging our Secure FTP Server.

ICS has extensive experience in creating customized Medical File Review solutions for clients in the Workers' Compensation, Auto, Liability, Group Health, Disability, and Federal industries.
